SUMMARY

Motivated Computer Science student specializing in AI and ML with strong programming, DSA, and problem-solving skills. Experienced in building scalable web interfaces and implementing machine learning models using Python and modern frameworks. Passionate about creating efficient, user-focused solutions and continuously improving through hands-on projects and competitive coding.

SKILLS

- **Languages:** Python
- **Data Science & ML:** NumPy, Pandas, Matplotlib, Scikit-Learn, Machine Learning Algorithms
- **Core CS Fundamentals:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)
- **Tools & Databases:** SQLite, MYSql, Git/GitHub, VS Code

PROJECTS

Heart Disease Prediction using Machine Learning

February 2026 – March 2026

GitHub: github.com/satishx9/Heart-Disease-Prediction-using-Machine-Learning-

Tools: Python, Jupyter Notebook, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Description: Developed a machine learning model to predict the presence of heart disease using clinical features such as age, cholesterol level, resting blood pressure, and maximum heart rate. Compared multiple classification algorithms to identify the most accurate model.

Responsibilities:

- Performed data preprocessing including handling missing values and feature scaling
- Conducted exploratory data analysis (EDA) to understand data patterns and correlations
- Implemented multiple models: Logistic Regression, KNN, Decision Tree, XGBoost, Random Forest, and SVM
- Evaluated models using accuracy, precision, recall, and F1-score
- Achieved approximately 90% prediction accuracy with optimized model

Breast Cancer Classification using Machine Learning

February 2025 – May 2025

GitHub: github.com/satishx9/Breast-Cancer-classification-in-Machine-Learning

Tools: Python, Jupyter Notebook, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Description: Developed a machine learning model for breast cancer classification and performed comparative analysis of multiple algorithms to evaluate performance using metrics such as accuracy, precision, and F1-score.

Responsibilities:

- Implemented and compared 5 machine learning algorithms for classification
- Analyzed model performance using evaluation metrics like accuracy, precision, recall, and F1-score
- Created visualizations in Jupyter Notebook to interpret and present results effectively
- Achieved approximately 95% accuracy in breast cancer classification
- Managed project versioning and code using GitHub: github.com/satishx9/Breast-Cancer-classification-in-Machine-Learning

EDUCATION

BTech - Computer Science (AI and ML)	2022 - 2026
Swami Vivekananda Institute of Technology, Hyderabad	CGPA: 7.94/10
Intermediate - Mathematics, Physics, and Chemistry	2020–2022
Loyola Academy Junior College, Hyderabad	CGPA: 8.85/10
SSC	2019–2020
Tagore’s Home High School, Hyderabad	CGPA: 9.5/10

ACHEIEVEMENTS

Event Coordinator | SVIT College Cultural Committee

- Organized and managed large-scale cultural events, overseeing logistics and team coordination to ensure seamless execution.

Technical Participant | Coding & Competitive Programming

- Active participant in college-level coding competitions, focusing on optimizing Data Structures and Algorithms (DSA).
