Summary

Motivated Computer Science student specializing in AI and ML with strong programming, DSA, and problem-solving skills. Experienced in building scalable web interfaces and implementing machine learning models using Python and modern frameworks. Passionate about creating efficient, user-focused solutions and continuously improving through hands-on projects and competitive coding.

Skills

Languages: Python

Data Science & ML: NumPy, Pandas, Matplotlib, Scikit-Learn, Machine Learning Algorithms, RAG

Core CS Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

Tools & Databases: SQLite, MySQL, Git/GitHub, VS Code

Experience

Alonzo AI

May 2026 – June 2026

AI/ML Intern

Hyderabad, India

- Working on EduSim, an AI-powered educational platform featuring intelligent tutoring and interactive simulations for School students.
- Contributing to frontend, backend, AI model integration, and RAG-based educational retrieval systems.
- **Tech Stack:** React, FastAPI, Python, SQLite/PostgreSQL, FAISS (Vector DB), Sentence Transformers, OpenRouter API (Gemini)

Projects

Heart Disease Prediction using Machine Learning

February 2026 – March 2026

- **GitHub:** github.com/satishx9/Heart-Disease-Prediction-using-Machine-Learning
- **Tools:** Python, Jupyter Notebook, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- Developed a machine learning model to predict the presence of heart disease using clinical and patient health datasets.
- Performed data preprocessing including handling missing values, feature scaling, and data cleaning to improve model performance.
- Conducted exploratory data analysis (EDA) to identify trends, feature correlations, and important health indicators.
- Implemented and compared multiple machine learning algorithms including Logistic Regression, KNN, Decision Tree, Random Forest, XGBoost, and SVM.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics for comparative analysis.
- Achieved approximately **90% prediction accuracy** using optimized machine learning models.

Breast Cancer Classification using Machine Learning

February 2025 – May 2025

- **GitHub:** github.com/satishx9/Breast-Cancer-classification-in-Machine-Learning
- **Tools:** Python, Jupyter Notebook, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- Developed a machine learning model for breast cancer classification using medical diagnostic datasets.
- Implemented and compared 5 machine learning algorithms to evaluate classification performance and prediction accuracy.
- Performed data preprocessing, feature analysis, and exploratory data analysis (EDA) for improved model understanding.
- Evaluated models using accuracy, precision, recall, and F1-score metrics to identify the best-performing algorithm.
- Created visualizations and analytical reports in Jupyter Notebook to effectively interpret and present results.
- Achieved approximately **95% classification accuracy** using optimized machine learning techniques.
- Managed project versioning and source code using GitHub for collaboration and project tracking.

Education

BTech – Computer Science (AI and ML) <i>Swami Vivekananda Institute of Technology, Hyderabad</i>	2022 – 2026 <i>CGPA: 8.09 / 10</i>
Intermediate – Mathematics, Physics, and Chemistry <i>Loyola Academy Junior College, Hyderabad</i>	2020 – 2022 <i>CGPA: 8.85 / 10</i>
SSC <i>Tagore’s Home High School, Hyderabad</i>	2019 – 2020 <i>CGPA: 9.5 / 10</i>

Achievements

- **Event Coordinator | SVIT College Cultural Committee**
Coordinated cultural events by collaborating with teams, managing event activities, and ensuring smooth execution.
- **Technical Participant | Coding & Competitive Programming**
Active participant in college-level coding competitions, focusing on optimizing Data Structures and Algorithms (DSA).
